# Care Instruction

---

- **Check the washing label**

Before washing, carefully check the label on the sofa cover and follow the instructions provided.

- **Separate washing**

If the sofa cover is made of different colored materials, it's best to wash it separately to avoid color transfer.

- **Choose the right detergent**

Use a mild detergent and avoid cleaners that contain bleach or strong oxidants.

- **Water temperature control**

Select the appropriate water temperature according to the material of the sofa cover. Generally, lukewarm water (up to 30°C) or cold water is more suitable.

- **Gentle washing**

Choose a gentle washing cycle to minimize excessive agitation and protect the texture of the cover.

- **Avoid prolonged soaking**

Long soaking (no more than 30 minutes) can cause color fading or damage to the fibers.

- **Rinse thoroughly**

Make sure the detergent is completely rinsed off to avoid adverse effects on the cover.

- **Drying method**

Choose the appropriate drying method based on the material of the cover. Air drying in the shade (without wringing) or low-temperature drying are best; avoid high temperatures.

- **Avoid direct sunlight**

Direct sunlight may cause colors to fade; try to avoid exposing the cover to the sun when drying.

- **Storage**

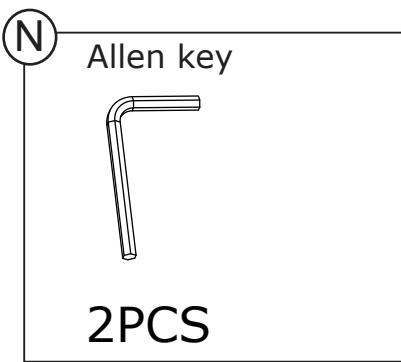

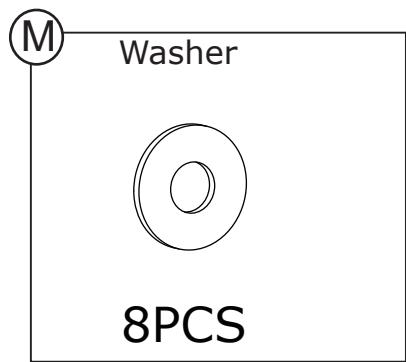

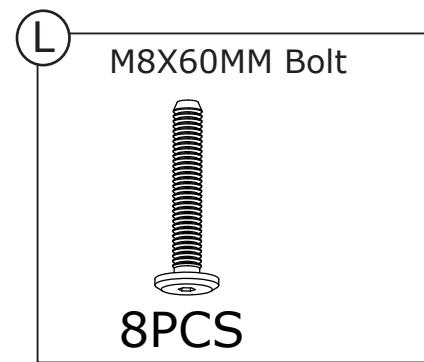

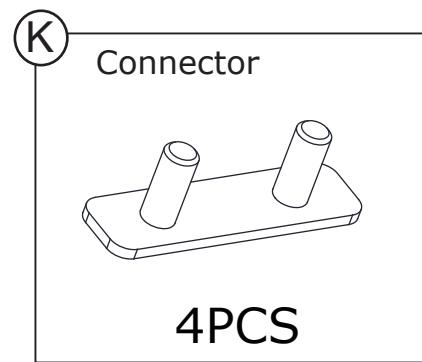

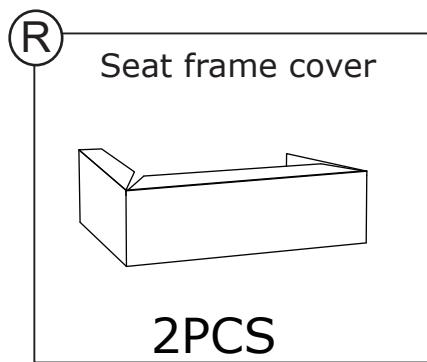

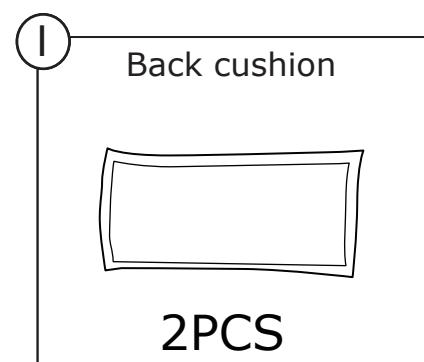

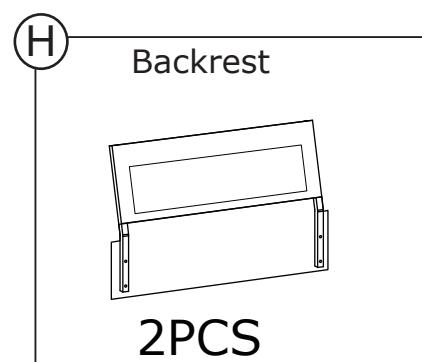

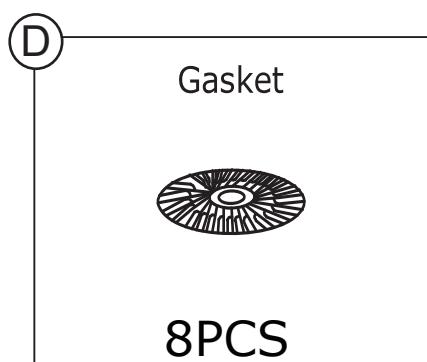

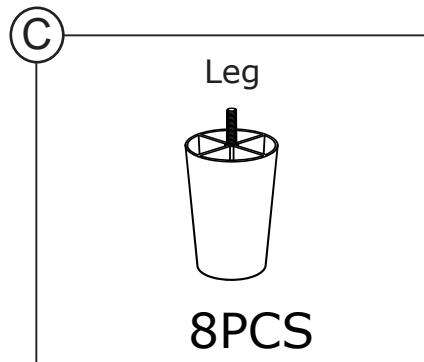

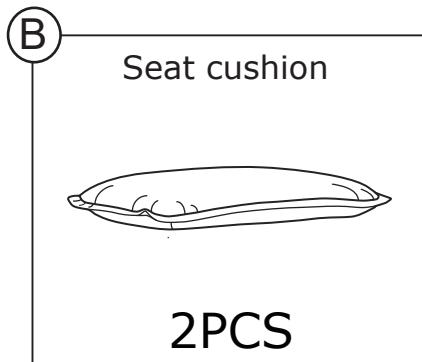

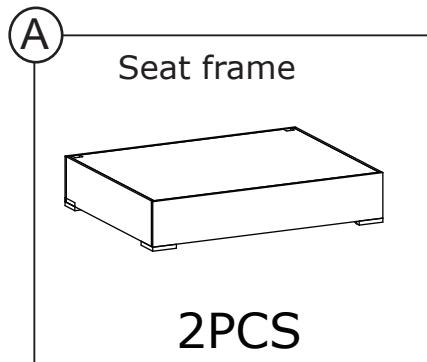

Protect the cover from moisture and mildew.

- **Careful ironing**

When using steam ironing, place a damp cloth over the fabric to prevent shine (known as the "aurora effect").
