#### **COMPONENT BREAKDOWN LIST:**

Test Item	Component Description
01	Silvery metal (Long - Allen head bolt)
02	Silvery metal (Short - Allen head bolt) (Same item 01)
03	Silvery metal (Allen head bolt)
04	Silvery metal (Allen head bolt) (Same item 03)
05	Silvery metal (Allen head screw)
06	Silvery metal (Allen head screw)
07	Silvery metal (Insert nut)
08	Silvery metal (Cross dowel)
09	Silvery metal with golden plating (Screw)
10	Silvery metal (Bracket)
11	Antique grey coating on wood (Color panel)
12	Grey coating on wood (Color panel)
13	Plywood (Bunk bed)
14	Natural (Bunk bed)
15	Normal white coating on wood (Color panel)
16	Silvery metal (Lock washer)
17	Silvery metal (Flat washer)
18	White paper with yellow/ black printing and transparent plastic cover (Label)
19	MDF wood (Bunk bed)

#### Remark:

- (1) Test result was transferred from report# 76124-011123 Revised 1.
- (2) Test result was transferred from report# 76124-070037.
- (3) Test result was transferred from report# 76124-050180.
- (4) Test result was transferred from report# 76124-100252.

#### Method:

1) Lead in paint and other similar surface coatings:

The test is conducted according to the US CPSC Standard Operating Procedure for Determining Lead (Pb) in Paint and Other Similar Surface Coatings, February 25, 2011 (CPSC-CH-E1003-09.1)

Lead in metals:

The test is conducted according to the US CPSC Standard Operating Procedure for Determining Total Lead (Pb) in Children's Metal Products (Including Children's Metal Jewelry), November 15, 2012 (CPSC-CH-E1001-08.3)

3) Lead in other non-metal materials including plastics, glass and leather material:

The test is conducted according to the US CPSC Standard Operating Procedure for Determining Total Lead (Pb) in Non-Metal Children's Products, November 15, 2012 (CPSC-CH-E1002-08.3)

Note: ND = Not Detected (Lab reporting limit: 10 ppm)

NA = Not applicable

ppm = part per million = mg/kg = milligram per kilogram

#### Remark:

#: The accessibility of the submitted sample is verified according to 16 CFR 1500.87 (e) before and after abuse.

## 3. ASTM F1427 - 21e1 Standard Consumer Safety Specification For Bunk Beds

Clause	Requirement	Rating	Notes
	nce Requirements:		
4.1 Vertical			·
4.1.1	All vertical protrusions along the top inside surfaces of any individual component (including but not limited to bed end structures and guard rails) of the upper bunk shall not extend more than 3/16 in. (4.8 mm) above the upper edge of the adjacent surface.  Ladder stiles (uprights) shall not extend more than 3/16 in. (4.8 mm) above the upper edge of the adjacent surface.	Р	✓ Vertical protrusion:0.18in. Position: corner post.  ✓ Ladder stiles:0.04in.
4.1.2	Any cap used along the top surface of the upper bunk shall not have a vertical protrusion greater than 3/16 in. (4.8 mm) at the edge of the protrusion above the upper edge of the adjacent surface. If the cap is flush with or overhangs the edge of the corner post or other vertical protrusion, the maximum vertical protrusion shall not exceed 3/16 in. (4.8 mm). The cap shall have a maximum height of no more than 20% of the width or diameter of the cap. At no point shall the cap overhang the post more than 1/16 in. (2 mm). The cap shall fit flush with the top of the corner post.	NA	☐ H:/in. W:/_in. (H <sub>max</sub> = 20%W) ☑ No cap
4.2	Fit of Top Bed to Bottom Bed: The bed post shall be designed so that the minimum height of lift to allow horizontal disengagement of the top bed from the bottom bed shall be 1.25in., or a fastening mechanism may be used that will prevent the disengagement of the top bed from the bottom bed.	NA	Record:/in.  ☐ A fastening mechanism provided  ☑ Bed post no separate
4.3	Mattress and Foundation Size and Fit (Top Bed): There shall be no gaps between the interior bed structure and the edges of the mattress and foundation that will permit complete passage of the wedge block when tested in accordance with 5.2.	Р	
4.4	Mattress Size and Fit (Lower Foundation): There shall be no space, between the edge of the manufacturer's recommended mattress and the interior boundary of any component(s) attached to lower bunk (for example, ladders, book shelves, desk), greater than 1.88 in. (48 mm) and smaller than 9 in. (229 mm), when tested in accordance with 5.3.	Р	
4.5 Upper a	nd Lower Foundation Support Systems:		
4.5.1	The foundation support systems shall confine the horizontal position of the mattress and the foundation and shall prohibit the mattress and foundation from falling when the mattress or foundation is manipulated.	Р	
4.5.2	In the event cross-members are utilized, a minimum of two per bed are required. If more than two cross-members are utilized, they shall be spaced so that the distance between adjacent cross-members or between the cross-members and the bed end structures will not permit complete passage of the wedge block or will allow complete passage of both the wedge block and the 9 in. (229 mm) diameter rigid sphere when tested in accordance with 5.9.	Р	Upper foundation: -Slat to slat: 3 inSlat to Bed end structure: 2-1/4 in. Lower foundation: -Slat to slat: 9-1/4 inSlat to Bed end structure: 2-1/4 in.
4.5.3	The foundation support system shall not be capable of being dislodged without the release of positive fastening devices or the use of hand tools.	Р	
4.5.4	The foundation support system shall not fail when tested in accordance with 5.4.	Р	
4.6 Side Ra			I
4.6.1	Bolt-On Side Rails, that attach at their ends or on their side to the bed post, are secured at each end by _2_ bolts with a minimum size of	Р	If it is Hook-On side rail, NA

Clause	Requirement	Rating	Notes
4.6.2	Hook-On Side Rails, securely attached to the bed post. Hook-on	NA	If it is Bolt-On side rail, NA
	attachments shall require an additional action other than an upwards		
	force to disengage.		
4.6.3	Side Rail Attachments:	Р	
	There shall be no structural failure of bed side rail fastening systems when tested in accordance with 5.5.		
4.7 Cuardrai			
4.7 Guardrai 4.7.1	The underside of the foundation is:38in. from the floor.	Р	
4.7.1	(REQ: over 30 inches.)	Г	
	How many guardrail(s) accompany the bed:2_		
	(REQ: 2 guardrails.)		
4.7.2	Any intentional release of fastening device is present for guardrails so	Р	
	that they cannot be removed unless forces are applied sequentially in		
	different direction? Yes		
4.7.3	The upper edge of the guardrails is: <u>6-3/4</u> in. above the sleeping	Р	
	surface when a mattress of the thickness that is the maximum specified		
474	by the manufacturer's instruction is used on the bed. (REQ: > 5in.)	- 1	
4.7.4	With no mattress on the bed, there shall be no openings in the rigid bed	Р	
	structure below the lower edge of any opening of the guardrail that would permit complete passage of the wedge block when tested in accordance		
	with 5.6.		
4.7.5	The guardrail terminate before reaching the bed end structure, the	Р	
	distance between either end of the guardrail and the bed end structures	•	
	in the same plane when measured at a point 5 in. above the sleeping		
	surface as established by the maximum mattress thickness specified by		
	the manufacturer: <u>15</u> in. (R: < 15in.)		
	The second guardrail terminate before reaching the bed end structure,		
	the distance between either end of the guardrail and the bed end structure		
	when measured horizontally between the bed end structure and the nearest point on the guardrail: /_ in. ( $R$ : $\leq$ 0.22in.)		
4.8 Bed Stru			
4.8.1	The total distance between the two posts at the head of the upper bunk:	Р	
1.0.1	37-1/4 in.	•	
	The distance between the two posts at the head of the upper bunk at 5 in		
	above the sleeping surface: <u>37-1/4</u> in.		
	Percentage of that at the head: <u>100</u> % ( <i>R</i> : ≥ 50%)		
	The total distance between the two posts at the foot of the upper bunk:		
	37-1/4_ in.		
	The distance between the two posts at the foot of the upper bunk at 5in		
	above the sleeping surface: 25-1/2 in.		
4.8.2	Percentage of that at the foot: <u>68.5</u> % ( <i>R</i> : ≥ 50%)  There shall be no openings in the rigid end structures of the upper	Р	
r.U.Z	bunk/bunks that will permit the free passage of the wedge block when	•	
	tested in accordance with 5.7.1. This requirement shall apply only to those		
	portions of the bed end structure that are above the foundation support		
	system of the upper bunk/bunks.		
4.8.3	When tested in accordance with 5.7.2, there shall be no openings within	Р	
	the entire boundary of the lower bunk that will permit free passage of the		
	wedge block, unless they are large enough to permit the free passage of		
	a 9 in. (229 mm) diameter rigid sphere. This requirement does not apply		
	to openings that are below the level of the lower bunk foundation support		
	system. This requirement shall apply to that portion of the bed structure that is between the level of the lower bunk foundation support system and		
	the level of the upper bunk foundation support system. Such openings		
	include, but are not limited to, bed end structures, foundation, ladders,		
	desks, or bookshelf components, or a combination thereof, as offered with		
	the bed for purchase and designed to be attached to the bed structure.

Clause	Requirement	Rating	Notes
6.2.1.1	If the foundation is not an integral part of the bed structure, the warnin label shown in either Fig. 10(a) or Fig. 10(b) shall be attache permanently to the inside of a bed end structure of the upper bunk in location that cannot be covered by the bedding but that may be covered by the placement of a pillow.	ed a	
	<u></u> <u></u> <u></u> warning		
	To help prevent serious or fatal injuries from entrapment or falls:  Never allow a child under 6 years on upper bunk.  Use only mattress which is 74"–75" long and 371/2"–381/2" wide on upper bunk.  Ensure thickness of mattress and foundation combined does not exceed" and mattress is at least 5" below upper edge of guardrails.  Use guardrails on both sides of upper bunk.  Prohibit horseplay on or under bed(s).  Prohibit more than one person on upper bunk.  Use ladder for entering and leaving upper bunk.  STRANGULATION HAZARD — Never attach or hang items to any part of the bunk bed that are not designed for use with the bed; for example, but not limited to, hooks, belts, and jumpropes.		
	(a)		
	<u> </u>		
	To help prevent serious or fatal injuries from entrapment or falls:  Never allow a child under 6 years on upper bunk.  Use only mattress meeting the following specifications on upper bunk:  Bed Type  Length  Standard Length  74"-75"  37 1/2"-38 1/2"  Extra Long  79"-80"  37 1/2"-38 1/2"  Ensure thickness of mattress and foundation combined does not exceed" and mattress is at least 5" below upper edge of guardrails.  Use guardrails on both sides of upper bunk.  Prohibit horseplay on or under bed(s).  Prohibit more than one person on upper bunk.  Use ladder for entering and leaving upper bunk.  STRANGULATION HAZARD — Never attach or hang items to any part of the bunk bed that are not designed for use with the bed; for example, but not limited to, hooks, belts, and jumpropes.		
	DO NOT REMOVE THIS LABEL

### 4. 16 CFR Part 1213 Safety Standard For Entrapment Hazards In Bunk Beds

Clause	Requirement	Rating	Notes
1213.3	Requirements		
1213.3(a)	Guardrails		
	Any bunk bed shall provide at least two guardrails, at least one on each side of the bed, for each bed having the underside of its foundation more than 30 inches (760 mm) from the floor.	Р	
	One guardrail shall be continuous between each of the bed's end structures. "Continuous" means that any gap between the guardrail and end structure shall not exceed 0.22 inches (5.6mm) (so as to not cause a finger entrapment hazard for a child).	Р	
	The other guardrail may terminate before reaching the bed's end structures, providing there is no more than 15 inches (380mm) between either end of the guardrail and the nearest bed end structures.	Р	
	For bunk beds designed to have a ladder attached to one side of the bed, the continuous guardrail shall be on the other side of the bed.	Р	
	Guardrails shall be attached so that they cannot be removed without either intentionally releasing a fastening device or applying forces sequentially in different directions.	Р	
	The upper edge of the guardrails shall be no less than 5 inches (130 mm) above the top surface of the mattress when a mattress of the maximum thickness specified by the bed manufacturer's instructions is on the bed. This requirement does not prohibit a wall-side guardrail that terminates in a quarter-circle bend and attaches to the side rail of the upper bunk foundation.	Р	
	With no mattress on the bed, there shall be no openings in the structure between the lower edge of the uppermost member of the guardrail and the underside of the upper bunk's foundation that would permit passage of the wedge block of this part when tested in accordance with the procedure at §1213.4(a).	Р	
1213.3(b)	Bed end structures.		
	The upper edge of the upper bunk end structures shall be at least 5 inches (130 mm) above the top surface of the mattress for at least 50 percent of the distance between the two posts at the head and foot of the upper bunk when a mattress and foundation of the maximum thickness specified by the manufacturer's instructions is on the bed.	Р	
	With no mattress on the bed, there shall be no openings in the end structures above the foundation of the upper bunk that will permit the free passage of the wedge block when tested in accordance with the procedure at § 1213.4(b).	Р	
	When tested in accordance with § 1213.4(c), there shall be no openings in the end structures between the underside of the foundation of the upper bunk and upper side of the foundation of the lower bunk that will permit the free passage of the wedge block, unless the openings are also large enough to permit the free passage of a 9 inch (230 mm) diameter rigid sphere.	Р	
	All portions of the boundary of any opening required by §§ 1213.4(c)(1) and (2) to be probed by the wedge block, and that permits free passage of a 9-inch diameter sphere, must conform to the neck entrapment requirements of § 1213.4(c)(3).	Р	
1213.5	Marking and labeling.	Р	
1213.5(a)	There shall be a permanent label or marking on each bed stating the name and address (city, state, and zip code) of the manufacturer, distributor, or retailer; the model number; and the month and year of manufacture.	Р

### 5. 16 CFR Part 1513-Requirements For Bunk Beds

Clause	Requirement	Rating	Notes
1513.3 Req			
(a) Guardra			
(1)	Any bunk bed shall provide at least two guardrails, at least one on each side of the bed, for each bed having the underside of its foundation more than 30 inches (760 mm) from the floor.	Р	
(2)	One guardrail shall be continuous between each of the bed's end structures. "Continuous" means that any gap between the guardrail and end structure shall not exceed 0.22 inches (5.6 mm) (so as to not cause a finger entrapment hazard for a child).	Р	
(3)	The other guardrail may terminate before reaching the bed's end structures, providing there is no more than 15 inches (380 mm) between either end of the guardrail and the nearest bed end structure.	Р	
(4)	For bunk beds designed to have a ladder attached to one side of the bed, the continuous guardrail shall be on the other side of the bed.	Р	
(5)	Guardrails shall be attached so that they cannot be removed without either intentionally releasing a fastening device or applying forces sequentially in different directions.	Р	
(6)	The upper edge of the guardrails shall be no less than 5 inches (130 mm) above the top surface of the mattress when a mattress of the maximum thickness specified by the manufacturer's instructions is on the bed. This requirement does not prohibit a wall-side guardrail that terminates in a quartercircle bend and attaches to the side rail of the upper bunk foundation.	P	
(7)	With no mattress on the bed, there shall be no openings in the structure between the lower edge of the uppermost member of the guardrail and the underside of the upper bunk's foundation that would permit passage of the wedge block shown in Figure 1 of this part when tested in accordance with the procedure at § 1513.4(a).	P	
(b) Bed end	structures.		
(1)	The upper edge of the upper bunk end structures shall be at least 5 inches (130 mm) above the top surface of the mattress for at least 50 percent of the distance between the two posts at the head and foot of the upper bunk when a mattress and foundation of the maximum thickness specified by the manufacturer's instructions is on the bed.	Р	
(2)	With no mattress on the bed, there shall be no openings in the rigid end structures above the foundation of the upper bunk that will permit the free passage of the wedge block shown in Figure 1 when tested in accordance with the procedure at § 1513.4(b).	Р	
(3)	When tested in accordance with § 1513.4(c), there shall be no openings in the end structures between the underside of the foundation of the upper bunk and upper side of the foundation of the lower bunk that will permit the free passage of the wedge block shown in Figure 1, unless the openings arealso large enough to permit the free passage of a 9-inch (230-mm) diameter rigid sphere.	Р	
(4)	All portions of the boundary of any opening required by §§ 1513.4(c)(1) and (2) to be probed by the wedge block of Figure 1, and that permits free passage of a 9-inch diameter sphere, must conform to the neck entrapment requirements of § 1513.4(c)(3).	Р	
1513.5 Mar	king and labeling		
(a)	There shall be a permanent label or marking on each bed stating the name and address (city, state, and zip code) of the manufacturer, distributor, or retailer; the model number; and the month and year of manufacture.	Р

This test report is governed by the Terms and Conditions, available on request or attached to the end of this test report. Attention is especially drawn to the limitations of liability, indemnification and jurisdictional provisions defined therein. This report is issued strictly based on the testing of the samples submitted by you. The test results in this report refer only to the sample(s) actually tested and do not refer or be deemed to refer to any bulk production from which such sample(s) may be said to have been obtained. In the event that Eurofins MTS Consumer Product Testing (Vietnam) Co. Ltd ("ERF") was requested to survey and test any bulk production quantity of samples, ERF, in the absence of any contrary written instructions, performed random sampling of bulk production for testing purposes. Variations in the conditions under which samples are stored, transported, etc., may lead to variations in the test results. ERF cannot anticipate and shall not be held responsible for variations in test results that may be due to factors beyond ERF' control, such as, sample cross-contamination, evaporation of volatile substances due to storage temperature, humidity, etc. This report does not constitute a recommendation, actual or implied, for any specific course of action. Other than the expressed warranties made in the Terms and Conditions of the ERF Test Request Form, ERF makes no warranties or representations either express or implied with respect to this report. In no circumstances whatsoever shall ERF be liable for any consequential, special or incidental damages arising out of, or in connection with, this report.
